Quarter sized hail was reported in Red Oak.				

Storm Data and Unusual Weather Phenomena - April 2012

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
JOHNSON COUNTY --- 2.6 ESE JOSHUA ARPT [32.44, -97.36], 2.7 SE JOSHUA ARPT [32.42, -97.37]				
	04/03/12 11:41 CST		0.60M	Tornado (EF1, L: 1.16 mi , W: 60 yd)
	04/03/12 11:43 CST		0	Source: NWS Storm Survey
An EF-1 tornado occurred southeast of the city of Joshua. The tornado began near FM 3048 and Buffalo Lane and traveled to the north-northeast before lifting northeast of the intersection of CR 705 and CR 811. One manufactured home sustained extensive damage, and a barn suffered roof damage. Part of the exterior walls of the manufactured home fell outward and the roof was completely lost. Another manufactured home on the same property sustained damage. Across CR 705, a third manufactured home sustained damage to the exterior. The twister also overturned a horse trailer and damaged two riding lawnmowers on this property. The path length was just over a mile long with a maximum width around 60 yards. The maximum winds were estimated to be around 100 mph.				
ELLIS COUNTY --- 2.8 WNW STERRETT [32.49, -96.86], 2.3 NW RED OAK [32.55, -96.82]				
	04/03/12 12:00 CST		3K	Tornado (EF0, L: 4.35 mi , W: 200 yd)
	04/03/12 12:08 CST		3K	Source: NWS Storm Survey
A tornado began near Highland Road, east of I-35 in Red Oak and continued northeast into Dallas County. The tornado did minor EF-0 damage to trees, crops, and shingles while moving northeast through Ellis County. After the tornado crossed into Dallas County it strengthened and did more substantial damage in the city of Lancaster. The path length of the tornado in Ellis County was approximately 4.4 miles long, but the total path length was 13.7 miles long.				
JOHNSON COUNTY --- 1.4 N BURLESON [32.55, -97.32]				
	04/03/12 12:00 CST		15K	Hail (1.50 in)
	04/03/12 12:00 CST		0	Source: Storm Chaser
Quarter to ping pong ball sized hail was reported in Burleson near Interstate 35 and the Wilshire Blvd exit.				
PARKER COUNTY --- ALEDO [32.70, -97.60]				
	04/03/12 12:05 CST		1K	Hail (1.00 in)
	04/03/12 12:05 CST		0	Source: Amateur Radio
Quarter sized hail was reported in Aledo.				
DALLAS COUNTY --- 2.7 E DE SOTO CARROLL ARPT [32.55, -96.82], 2.2 NW HUTCHINS [32.67, -96.75]				
	04/03/12 12:08 CST		0.40B	Tornado (EF2, L: 9.35 mi , W: 200 yd)
	04/03/12 12:35 CST	10	3K	Source: NWS Storm Survey
This tornado is a continuation from Ellis County. The tornado crossed into Dallas County near I-35E at the Ellis/Dallas County line. Light damage was noted as the tornado crossed into the county but then the tornado moved into the city of Lancaster and struck the Portofino Apartments where it damaged the roofs of two buildings and tore the roof off another building. Cars were moved in the parking lots, and the windows were blown out in one car. The tornado did significant damage to homes just northeast of the apartment complex, beginning on Sunny Meadow Dr. However, the most significant damage occurred near the intersections of Wintergreen Rd, Telephone Rd, and North Dallas Ave. Many homes in this area were heavily damaged or destroyed. Some cars were pushed into fences, many trees and tree branches were knocked down, an RV was crumpled, and some fence boards penetrated homes. The Cedar Valley Christian Academy also sustained heavy damage when it lost an entire wall. The tornado continued northeast crossing Interstate 20 near Dynasty Drive. The tornado hit a trucking company along the interstate, lofting several empty semis into the air. About 50 semitrailers were damaged or destroyed. The tornado damaged a few additional trees northeast of the trucking company and caused some minor roof damage in the Stagecoach neighborhood. The damage track ended near Palm Island St and Tioga St. In the city of Lancaster, 64 homes were destroyed, 51 sustained major damage, and another 58 sustained minor damage. An additional two homes were destroyed in the Dallas city limits. One home was destroyed when one of the semis from the trucking company was thrown into the house. The path length of the tornado in Dallas County was approximately 9.4 miles long but the total length of the tornado was 13.7 miles. Maximum estimated winds were 130 mph with a maximum width of 200 yards. Ten people in the city of Lancaster were injured, and two people sustained serious injuries.				
JOHNSON COUNTY --- 2.3 ENE BURLESON [32.54, -97.28], 2.3 ENE BURLESON [32.54, -97.28]				
	04/03/12 12:08 CST		0	Tornado (EF0, L: 0.27 mi , W: 50 yd)
	04/03/12 12:09 CST		2K	Source: Other Federal Agency
A brief tornado occurred down in open field approximately 2 miles southeast of Spinks Airport. This tornado was observed by at least 2 storm chasers and the airport manager.				
PARKER COUNTY --- 3.9 NNE LAKE WEATHERFORD [32.83, -97.64]				
	04/03/12 12:10 CST		40K	Thunderstorm Wind (EG 70 kt)
	04/03/12 12:10 CST		0	Source: Trained Spotter

Storm Data and Unusual Weather Phenomena - April 2012

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
Roof and structural damage to a home on Valley View Drive in the Armadillo Hills neighborhood off Vally View Dr was reported by spotters. A shed also sustained roof damage, and 6 other residences sustained minor roof damage in the same neighborhood. The damaging winds also broke trees in half, knocked down several large branches, and scattered insulation and other construction materials. Spotters reported the damage was caused by thunderstorm winds estimated around 80 mph.				
TARRANT COUNTY --- 0.3 SSE TATE SPGS [32.68, -97.18]				
	04/03/12 12:21 CST		5K	Hail (0.88 in)
	04/03/12 12:21 CST		0	Source: Public
Nickel sized hail was reported at Interstate 20 and Kelly Elliott Road.				
TARRANT COUNTY --- 1.3 S KENNEDALE [32.63, -97.22], 1.3 WNW ARLINGTON PYLON ARPT [32.71, -97.20]				
	04/03/12 12:21 CST		0.20B	Tornado (EF2, L: 6.40 mi , W: 150 yd)
	04/03/12 12:40 CST	7	0	Source: NWS Storm Survey
An EF-2 tornado began in Kennedale, and then moved north-northeast into Arlington. In its occlusion phase, the tornado curved back to the northwest; ending its track near the east shores of Lake Arlington along Waterview Drive. The path length of the tornado was 6.4 miles long with a width of approximately 150 yards. Damage from the tornado began near the Texas Raceway. Five manufactured homes were heavily damaged or destroyed near the racing strip. Moving to the north-northeast, the tornado produced sporadic damage to trees, power poles, and a storage facility as the storm organized rapidly. Part of the roof of a warehouse at a business on Tower Drive near Business 287 was torn off and tossed onto a city water tower nearby. The warehouse was also damaged by debris tossed by the tornado. Other businesses near this intersection were also damaged. Damage to residences began north of Sublett Rd. EF-2 damage was noted to a few homes between Sublett Rd and Hwy 287, but most areas received EF-0 or EF-1 damage. Approximately 143 homes and apartments sustained some type of damage in this area. Most of the homes appeared to have the initial failure at or near the garage, with subsequent damage coming to exterior walls or portions of roofs. Before the tornado crossed Hwy 287, it damaged the roofs of two buildings at the Chesterfield Apartments. Once the tornado crossed Hwy 287, it cut a path to the north-northeast causing mostly minor roof and fence damage to approximately 25-30 homes between Hwy 287 and Interstate 20. The tornado crossed Interstate 20 between Kelly Elliott Rd and Green Oaks Blvd. First the tornado damaged a church on the north side of the interstate, then the tornado went on to do significant damage in the Oldfield neighborhood just north of Interstate 20 near Martin High School. Approximately 100 homes were damaged in this neighborhood with an additional 85 damaged in the surrounding areas. Several homes experienced significant damage to garages and progressive failure of garage walls and portions of roofs. A few residences in this neighborhood along Haverford Dr and Thorncliffe Dr sustained EF-2 damage. Large trees were also uprooted in the neighborhood. The damage path continued to the north from this area with several other homes and trees sustaining damage near Little Road. Just west of Martin High School, the tornado began to occlude and turn northwest. At this point, near Green Oaks Boulevard and Chaperito Street, a nursing home suffered significant roof and outside wall damage, with the initial failure occurring near a large window. Nearly all of the residential damage in Kennedale and Arlington was EF-0 or EF-1. Only a small portion of the damage path suffered EF-2 damage. A total of 5 homes in Kennedale and 13 homes in Arlington were determined to be destroyed. Another 44 homes sustained major damage and 247 sustained minor damage. An additional 273 residences were affected by the storms on this day. Maximum estimated winds with the tornado were 135 mph. Eight people sustained injuries from the tornado, but only one of those injured was considered severe.				
TARRANT COUNTY --- 3.3 NE ARLINGTON [32.76, -97.08]				
	04/03/12 12:49 CST		25K	Thunderstorm Wind (EG 65 kt)
	04/03/12 12:49 CST		0	Source: Trained Spotter
Tree damage was reported around the Bank of America building in Arlington; near the intersection of Ballpark Way and E Lamar Blvd. A few trees had 2" diameter branches snapped off and at least one tree was broken off near the ground.				
TARRANT COUNTY --- EULESS [32.83, -97.08]				
	04/03/12 12:50 CST		0.50M	Hail (1.75 in)
	04/03/12 12:50 CST		0	Source: Amateur Radio
Golf ball sized hail was reported in Euless.				
DALLAS COUNTY --- 0.8 NW SAYENE [32.78, -96.69], 0.8 NW SAYENE [32.78, -96.69]				
	04/03/12 12:54 CST		4K	Tornado (EF0, L: 0.09 mi , W: 25 yd)
	04/03/12 12:55 CST		0	Source: NWS Storm Survey
A brief EF-0 tornado caused damage to a few trees and the roof of one home near Skyline High School in Dallas. The path of the tornado was 0.1 miles long, the width was 25 yards, and the maximum estimated winds were 80 mph.				
TARRANT COUNTY --- 0.3 NNE GREATER SW INTL ARPT [32.83, -97.05]				
	04/03/12 12:54 CST		12M	Hail (2.75 in)
	04/03/12 12:54 CST		0	Source: NWS Employee
Quarter to baseball sized hail was reported at the Fort Worth CWSU.				

Storm Data and Unusual Weather Phenomena - April 2012

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
TARRANT COUNTY --- 3.4 SSE TARRANT [32.77, -97.06], 3.4 SSE TARRANT [32.78, -97.06]				
	04/03/12 12:58 CST		55K	Tornado (EF0, L: 0.47 mi , W: 60 yd)

Storm Data and Unusual Weather Phenomena - April 2012

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
An EF-0 tornado with maximum estimated winds around 85 mph occurred in Mesquite. The tornado began near Independence Drive and Meadow Lane then tracked east. Minor roof damage was noted along the track of the tornado and several large trees were split or had large branches broken off. Near the end of the track on the east side of N Galloway Ave, a car service station sustained significant damage. The winds from the tornado penetrated the building through the large service doors. The roof was ripped off the building and the back wall collapsed. The path length of this tornado was 0.3 miles with a width of about 30 yards. Two people sustained minor injuries.				
HOPKINS COUNTY --- 0.9 NNE GREENVIEW [33.04, -95.71], 1.1 NNE GREENVIEW [33.04, -95.71]

Quarter sized hail fell in Killeen.				
KAUFMAN COUNTY --- 0.0 S FORNEY [32.75, -96.47], 4.9 NNW LAWRENCE [32.80, -96.35]				
	04/03/12 14:33 CST		0.10B	Tornado (EF3, L: 7.73 mi , W: 150 yd)
	04/03/12 14:39 CST	7	0	Source: NWS Storm Survey
An EF-3 tornado did extensive damage as it wound its way through the town of Forney. The tornado began near the intersection of Broad St and N Bois D'arc Street just southwest of Highway 80. As it moved to the northeast, the first significant damage was noted near Aimee St and N Bois D'arc St. There was substantial tree damage with some large trees uprooted near this intersection. Also, shingle damage, roof damage to a fire station nearby, blown out windows at a few homes and an outbuilding was destroyed, all near this intersection. A street sign at the intersection was also completely bent flat near the base. The tornado moved northeast and crossed Hwy 80 near the Forney Cleaners business where substantial roof and commercial sign damage occurred. Debris was also observed in the median between the east and westbound lanes near this location. The tornado continued northeast producing light damage to industrial buildings, but was largely over open fields. The tornado then crossed over Ridgecrest Rd and produced substantial damage to many homes in the Diamond Creek subdivision. One of the first homes struck was on Woodberry Dr and was completely destroyed. Several more homes were destroyed in this subdivision and other homes sustained substantial damage. It was determined that several of the destroyed homes were destroyed as the result of excessive lift being forced upon the roof, and the roofs of these homes were poorly attached to the external walls of the home. Once the roofs failed, pressure built up on internal walls causing the failure of nearly all external and internal walls. As the tornado continued northeast through the subdivision it consistently produced damage to homes, most of which was different degrees of roof or top floor damage. The tornado exited the subdivision at Crosby Elementary School. The tornado damaged several vehicles that were in the school's parking lot. One vehicle was lofted approximately 300 yards into a field northeast of the school. The school itself sustained mainly roof damage. Children were in the school when the tornado struck, but no injuries occurred. The tornado continued northeast for several miles, producing light/EF-0 damage along the way. In total, this tornado destroyed 14 homes, caused major damage to 28 homes and minor damage to another 42 homes. Many of the damaged homes were in the Diamond Creek Subdivision. Due to damage in the Diamond Creek Subdivision, the maximum estimated winds with this tornado were 170 mph. The path length was approximately 7.7 miles, and the maximum width was 150 yards. Seven people sustained non life-threatening injuries.				
KAUFMAN COUNTY --- 3.6 N FORNEY [32.80, -96.48]				
	04/03/12 14:35 CST		1M	Hail (3.50 in)

Hail up to the size of tea cups fell in eastern Rockwall County. This large hail was falling from the tornadic supercell that also produced the EF-2 tornado south of Royse City.				
HOPKINS COUNTY --- 2.8 NNE SULPHUR SPGS MUNI AR [33.18, -95.59], 3.3 NNE SULPHUR SPGS MUNI AR [33.19, -95.59]				
	04/03/12 14:54 CST		6K	Tornado (EF0, L: 0.58 mi , W: 50 yd)
	04/03/12 14:55 CST		0	Source: Trained Spotter
Trained spotters and Sulphur Springs PD reported a tornado near Highway 19 North and Loop 301 on the north side of town. This tornado touched down in open country but did damage to a few power poles, power lines, and trees. The tornado was rated an EF-0 with maximum estimated winds near 85 mph. The total path length was around 0.6 miles long with a width of approximately 50 yards.				
ROCKWALL COUNTY --- 2.0 SE BLACKLAND [32.88, -96.33], 3.1 E BLACKLAND [32.90, -96.30]				
	04/03/12 14:56 CST		15M	Tornado (EF2, L: 2.38 mi , W: 400 yd)
	04/03/12 15:02 CST	3	0	Source: NWS Storm Survey
A strong EF-2 tornado began in eastern Rockwall County and traveled northeast into Hunt County before lifting. The tornado touched down to the southwest of the intersection of FM 548 and Bent Rd in Rockwall County. The tornado quickly moved into a subdivision and severely damaged or destroyed several homes. The worst of the damage in this subdivision occurred along Laci Ln. Trees and shrubs northeast of these houses by a half mile or so were completely debarked and had no vegetation remaining. The tornado continued northeast and produced damage to homes along Country Manor Rd. There was one house that had a large portion of its roof/top story completely removed. A couple of small barns were also destroyed, one which contained a classic car which ended up blown into the back of a neighbor's house. The tornado continued northeast where it crossed Hwy 276 and sideswiped a cabinet factory. Part of the outside metal walls were crumbled. There was an incredible amount of industrial debris downstream of this factory north of the highway. The tornado continued northeast and demolished one mobile home and damaged another right at the Rockwall/Hunt County line. In total, 8 homes in Rockwall County were deemed destroyed, 17 sustained major damage, and 8 sustained minor damage. The path length of the tornado in Rockwall County was nearly 2.4 miles, but the total path length was 3.3 miles. Maximum estimated winds were 150 mph and the tornado was approximately 400 yards wide. Three people sustained minor injuries when their doublewide mobile home was struck near the Rockwall/Hunt County line.				
HUNT COUNTY --- 3.0 WSW UNION VLY [32.90, -96.30], 2.1 WSW UNION VLY [32.91, -96.28]				
	04/03/12 15:02 CST		0.50M	Tornado (EF2, L: 0.96 mi , W: 400 yd)
	04/03/12 15:04 CST		0	Source: NWS Storm Survey
A strong EF-2 tornado began in eastern Rockwall County and traveled northeast into Hunt County before lifting. As the tornado crossed into Hunt County, it destroyed one mobile home near the Rockwall/Hunt County Line. The tornado then continued to the northeast where it destroyed the roof of one more home before lifting north of Highway 276. The path length of the tornado in Hunt County was nearly a mile long, but the total path length was 3.3 miles. Maximum estimated winds with the tornado while it was in Hunt County were likely around 130 mph and the tornado was approximately 400 yards wide.

Quarter sized hail was reported on the west side of Palestine.				

A historic North Texas tornado outbreak occurred on April 3rd, with 17 tornadoes developing from the DFW Metroplex east to Hopkins County. An EF-3 tornado tore through the town of Forney, heavily damaging homes in the Diamond Creek subdivision. Three EF-2 tornadoes damaged parts of Arlington and Kennedale in Tarrant County; Red Oak, Lancaster, and Dallas in Ellis and Dallas counties; and Royse City in Rockwall and Hunt counties. An EF-1 tornado caused damage near Joshua in Johnson County, and the remaining 12 tornadoes were rated EF-0s. In addition to the tornadoes, large hail damaged many parts of the DFW Metroplex. Approximately 110 airplanes at DFW International Airport were damaged by the hail and taken out of service until repaired. No fatalities occurred and only 29 people were injured. Of the 29 injuries, only 3 were considered serious but everyone made a full recovery. The environmental set-up on this day consisted of a cut-off low over New Mexico with a front draped north-to-south across the western counties of the CWA. By

----------	-----------	-------------------	---------------------	------------------------

mid to late morning, strong and severe storms developed along the front as a lobe of energy rotated into west Texas and forcing from this energy overspread the front. The atmosphere was already unstable and uncapped by this time. In addition, a Mesoscale Convective System in Oklahoma sent an outflow boundary south across the Red River. This outflow boundary moved south of the DFW Metroplex by the late morning hours, and isolated storms began to develop south of the outflow boundary but east of the front. As these storms moved north and crossed the outflow boundary, the low level rotation increased and the storms quickly became tornadic. All of the tornadic storms were tied to this outflow boundary as it retreated north as a warm front.

Remains of a destroyed home sit in the Diamond Creek subdivision in the town of Forney, Texas after an EF-3 tornado ripped through the subdivision on April 3rd, 2012. Most of the significant damage with this tornado occurred in the Diamond Creek subdivision and an elementary school was also damaged. Photo Credit: NWS Fort Worth

Hail up to the size of pennies was reported one mile north of Tennessee Colony.				
ANDERSON COUNTY --- 2.8 ENE TENNESSEE COLONY [31.85, -95.81]				
	04/08/12 16:52 CST		10K	Hail (4.25 in)
	04/08/12 16:52 CST		0	Source: Emergency Manager
Softball sized hail was reported east of Tennessee Colony.				
Widely scattered showers and thunderstorms developed across the region under the influence of a weak shortwave. Most of the rain activity occurred along and east of the I-35 corridor. A few storms in Anderson County grew strong enough in the late afternoon hours to produce large hail. Softball sized hail was reported near Tennessee Colony.				
COOKE COUNTY --- GAINESVILLE [33.63, -97.15]				
	04/09/12 23:55 CST		1K	Thunderstorm Wind (EG 39 kt)
	04/09/12 23:55 CST		0	Source: Fire Department/Rescue
A weakened tree was knocked down onto a house in Gainesville from sub-severe winds associated with a thunderstorm. The tree also knocked down power lines near the house. The local automated weather station (KGLF) reported a 41 mph wind gust at the same time.				
As severe storms in southwest Oklahoma and northwest Texas moved into North Texas, they weakened. However, one storm in Cooke County produced gusty winds that knocked a weakened tree onto a home.
